

National HIV Testing Day 2019

June 27th is [National HIV Testing Day \(NHTD\)](#). NHTD was first observed on June 27, 1995 as a day to encourage people to [get tested for HIV](#), know their status, and get linked to care and treatment. This year's observance is important in light of the federal initiative to [End the HIV Epidemic](#). The NHTD 2019 theme is *Doing It My Way*. It focuses on how and why people can make testing a part of their lives - on their terms and in their way.

On this day, we unite with partners, health departments, and other organizations to raise awareness about the importance of HIV testing and early diagnosis of HIV.

Help encourage HIV testing on National HIV Testing Day and every day to ensure people get tested for HIV, know their status, and get linked to care and treatment services.

Want to know what's happening in your community? See below for a list of testing activities. For other free testing locations, visit <https://gettested.cdc.gov/>
